PROFESSIONAL SUMMARY

Frontend Developer specializing in React.js, JavaScript, and interactive UI engineering. Proven ability to ship production-grade interfaces — including a fully functional macOS web clone with draggable/resizable windows — using modern tools like GSAP and React.js. Passionate about performance optimization, component architecture, and building seamless user experiences. Actively seeking remote frontend roles where I can contribute from day one.

Frontend	React.js, HTML5, CSS3, SCSS, Responsive Design, Mobile-First Development
Libraries	GSAP
Backend	Express.js, Node.js
Dev Tools	Git, GitHub, VS Code, npm
AI & Concepts	Generative AI, Prompt Engineering, REST APIs

PROJECTS

macOS Web Interface Clone

Tech Stack: React.js, GSAP, CSS3

- Built a macOS-inspired web interface in React.js with draggable/resizable windows.
- Developed app components — Notes (with syntax highlighting), Music Player, GitHub Viewer — each with independent state.
- Implemented smooth animations using GSAP for a native desktop feel in the browser.

Smart Productivity OS (Dashboard)

Tech Stack: HTML5, CSS3, JavaScript

- Built a task and workflow management dashboard using vanilla JavaScript with a mini OS-inspired UI.
- Implemented dynamic task interactions and real-time DOM updates without any frameworks or libraries.
- Structured with semantic HTML5 and custom CSS3 for a clean, app-like interface.

Responsive Travel Website

Tech Stack: HTML5, CSS3, Responsive Design

- Built a fully responsive travel website using a mobile-first approach with semantic HTML5 and modern CSS3 layout techniques (Flexbox, Grid).
- Ensured cross-device compatibility with fluid typography and adaptive layouts.
